

2023 Transplant Outcomes

Hillman Center for Pediatric Transplantation

Patient Survival Rate*

January 2023 SRTR release

Liver

1 year: 96% (national average: 96%)

3 years: 92% (national average: 92%)

Intestine

1 year: 100% (national average: 92%)

3 years: 88% (national average: 76%)

Heart

1 year: 95% (national average: 91%)

3 years: 96% (national average: 88%)

Lung

1 year: 100% (national average: 93%)

3 years: 100% (national average: 66%)

Kidney

1 year: 100% (national average: 99%)

3 years: 100% (national average: 99%)

Blood and Marrow

Outcome Measure***	Type of Transplant	UPMC Children's Hospital of Pittsburgh
100-Day Survival ¹	All**	97% (national average: 92%)
One-Year Non-Relapsed Mortality ²	All**	9%
One-Year Overall Survival ³	All**	81% (national average: 77%)

1 Percentage of patients living 100 or more days following the transplant procedure

2 Percentage of patients who died due to causes other than related to underlying disease

3 Percentage of patients living one year following the transplant procedure

* Sources: Internal data; Scientific Registry of Transplant Recipients (www.srtr.org) January 2023 1 release

** Includes auto-BMT, allo-related BMT, allo-unrelated and cord blood transplants.

*** Blood and marrow measures through December 2021.

Transplant Program Volumes

Transplant Type	2022	Program Inception through 12/31/2021
Abdominal		
Liver and Liver/Kidney	15	1,516
Living-Donor Liver	9	186
Liver/Heart	2	2
Liver/Small Bowel/Intestine	2	292
Subtotal	28	1,996
Cardiopulmonary		
Heart	12	384
Lung	0	96
Heart/Lung	0	49
Heart/Liver	2	2
Subtotal	14	531
Kidney		
Living-Donor	7	258
Deceased-Donor	14	354
Subtotal	21	612
Blood and Marrow*		
Allo	24	496
Auto	12	306
Subtotal	36	802
Total	99	3,941

* These data do not include CAR-T patients.
