## OVERVIEW

This course will provide evaluation and critique of current and future standards of care in the treatment of the cardiovascular patient with respect to medical management and best practice guidelines for the primary care provider. It continues to focus on the new developments in cardiovascular imaging, appropriateness, and strategies to reduce patient readmission.

Each session will include a panel discussion and case studies.

### Objectives

- Understand the expanding care for patients with cardiac and vascular disease through cardiac rehabilitation.
- Understand the advanced interventions and treatment for patients post cardiac arrest.
- Understand the implications of a specialized center for atrial fibrillation.
- Understand the advanced interventional approaches to stroke management.
- Understand the appropriate patient selection and criteria for transcatheter aortic valve replacement (TAVR).
- Understand the management of critical limb ischemia.

### Who Should Attend

This course is designed for the primary care providers, cardiologists, advanced practice providers, registered nurses, and other interested health care professionals.
