MEDICINE

Program Overview

This conference is comprised of two parts: lecture part and hands-on skill lab workshop that includes cadaver workshop. The lecture topics covered include both advanced and fundamental topics. This includes discussions on interesting cases, hydro-dissection procedure, ultrasound-guided surgery, and dynamic ultrasound evaluation of various sports injuries.

During the hands-on live portion of the course, participants will be able to perform both diagnostic and interventional ultrasound of all 6 major joints (shoulder, elbow, wrist/hand, hip, knee, foot/ankle). Small groups are grouped based on experience level, with no more than 1-to-3 faculty-to-participant ratio.

Pre-conference material will be available for all participants, covering basic knowledges to get most out of the 2-day conferences for those who are new to sports ultrasound. Learning materials are optional but highly recommended for novice level ultrasound users prior to attending the conference..

Learning Objectives

The goals of the conference are to promote knowledge and hands-on experiences of sports ultrasound to participants. Participants will be able to properly identify indications of diagnostic sports ultrasound and demonstrate increased proficiency in performing interventional sports ultrasound.

Who Should Attend

Physicians, Residents, and Fellows

Continuing Education Credit

The University of Pittsburgh School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The University of Pittsburgh School of Medicine designates this live activity for a maximum of **20.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Other health care professionals are awarded **2.0** continuing education units (CEU's) which are equal to **20.5** contact hours.

Special Needs

Participation by all individuals is encouraged. Advance notification of any special needs will help us provide better service. Please notify us of your needs at least two weeks in advance of the program by calling **412-232-4072**.
