

DEFINING OUR MODELS OF CARE

THE PROFESSIONAL PRACTICE MODEL

Our **Professional Practice Model** (PPM) is our Shared Leadership Councils. This is our framework that provides the structure for nursing care.

UPMC Shadyside Shared Leadership Councils

Rooted in Caring  Guided by Innovation

Our Shared Leadership councils support and include the following:

1. Promote the professional role of the registered nurse to include accountability for one's own practice
2. Incorporate EBP
3. Include contemporary management concepts and theory
4. Address patient needs, patient population demographics, needs of nursing staff members, and ratio of nurses serving in various roles and levels
5. Ensure Continuity of Care
6. Support the **CARE DELIVERY MODEL**

Our PPM demonstrates:

1. Professional Values
2. Professional Relationships (Relationship Based Care)
3. A Care Delivery Model (Patient Centered)
4. Shared Leadership and Management (Our Council Structure)
5. Professional recognition and rewards (My Nursing Career, Cameo of Caring, Rookie of the Year)

THE CARE DELIVERY MODEL

The Care Delivery Model is one component of the PPM.

1. Describes how the delivery of nursing care actually takes place.
2. It is demonstrated in patient care assignments, IPOC's, and the involvement of the patient and/or family in this delivery.
3. Each unit can select what works best for their patient population.
4. Our care delivery model must comply with the PA State Nurses Practice Act.
