Student Nurse Opportunities

Ready to supplement your nursing education with real-world experience while earning some extra money? UPMC works with student nurses to create a flexible work schedule that allows you to make your education a priority. Whether you have prior experience or are just getting started, learn more about opportunities to build your resume.

While in Nursing School

If you haven't completed a clinical rotation just yet, explore these job opportunities:

Transporter — A fast-paced, social role, transporters play a vital part in the patient experience, help get patients and supplies where they need to go, and typically walk about seven miles a day.

Care Attendant or Telesitter — An essential source of support, care attendants and telesitters deliver some patient care, help patients with daily living, and serve as patient supervisors and companions.

Health Unit Coordinator (HUC) — Using strong communication and organization skills, HUCs greet all patients, family members, visitors, and staff, monitor patient flow processes, and coordinate patient procedures.

Student Behavioral Associate (SBA) — Providing medical and psychiatric patient care under the direction of a RN, SBAs assist nurses and other direct care staff in the provision of physical care and clinical intervention as assessed by clients' needs.

If you have completed at least one clinical rotation, or have experience in an acute care setting, explore these job opportunities:

OR Student Technician — OR Student Techs assist nurses with the set-up and ordering of instrument trays and perform patient care skills under the direction of a RN preceptor in Surgical Services.

Nursing Assistant (NA) — NAs provide some direct patient care under the direction of a RN, perform basic tests and catheter care, and assist patients with daily living.

Patient Care Technician (PCT) — Along with the tasks above, PCTs also assist with simple dressings, EKG tests, bladder scans, and specimen collections.

Patient Care Technician — Senior (PCT-Senior) — Along with the tasks above, PCT-Seniors also assist with removal of IV catheters and Foley catheters and may also perform phlebotomy and patient monitoring.

Patient Care Technician — Specialist (PCT–Specialist) — Along with the tasks above, PCT-Specialists also insert IVs and Foley catheters, as well as perform phlebotomy and straight catheterization.
