

The UPMC Teleconsult Center at UPMC Northwest

What Is the UPMC Teleconsult Center?

When the clinical care you need is not available in your area, the UPMC Teleconsult Center connects you to specialists at other UPMC facilities. This telemedicine technology uses secure video conferencing to connect you with a doctor in Pittsburgh or Erie that specializes in that clinical service.

The Benefits of Telemedicine

Telemedicine can help patients who are located far from large cities by providing:

- Access to specialists
- Reduced travel time and cost
- Timely treatments closer to home

Prior to Your Appointment

- You will be called a few days prior to your appointment to confirm the date and time. You will also receive instructions should you need to change or cancel your appointment.
- Please confirm that your patient medical record has been forwarded by your referring physician, or fax it directly to 814-677-7049.
- Plan at least one hour for your appointment and arrive 15 minutes before the scheduled time.

Once You Arrive

- Park in parking lot A, and enter through the Main Entrance. All parking is provided free of charge.
- As you enter through the Main Entrance, inform the main desk registration staff that you are here for a Telemedicine appointment.
- They will give you directions to the Teleconsult Center, located on the second floor of the hospital.
