

A GUIDE TO

Your Hospital Stay

UPMC Presbyterian

UPMC | PRESBYTERIAN

WELCOME LETTER FROM SANDY RADER, PRESIDENT

Welcome to UPMC Presbyterian and thank you for trusting us with your care.

At UPMC Presbyterian, we know that quality is more than state-of-the-art clinical services and advanced technology – quality is treating our patients with care and compassion, listening to their ideas, and using their feedback to improve our services. We also know that hospital stays can be stressful, so we have developed a few ways to help you feel as comfortable as possible.

During your stay, you can expect to be visited by a nurse leader, who manages all staff members on your unit. We call this **nurse leader rounding**. This visit will take less than 5 minutes and helps us be sure that your care needs are being met. You will also see our nurses doing **bedside shift report**, which is when the nurse going off duty meets with you, your support person(s), and the nurse coming on duty who will start taking care of you. Please use these opportunities to ask questions and share any concerns or suggestions you may have.

You will also see a white board in your room called the **communication board**, which is a tool we use to help keep you updated on the important details of your care during your stay. This will list things such as your room number, diet, activities, upcoming tests, and the names of your care team members. Every day, we will also give you a printed document called **My Daily Plan of Care** that will list your scheduled procedures, tests and lab results, and medicines. We encourage you to share this care plan with your support person(s).

Your feedback is important to us as it guides how we care for our patients. **Nurse leader rounds, bedside shift report, communication boards, and My Daily Plan of Care** are ways for you to tell us about your needs and share any concerns you may have about your care.

After you leave the hospital, **you may receive a survey through mail or email** that will ask you questions about your stay. I would like to personally request that you please take a few moments to complete this survey to let us know how we did. Your input is very important in our efforts to give our patients and support persons the best possible experience.

I want to personally thank you for choosing UPMC Presbyterian and for your input so we can continuously improve the services we provide.

Sincerely,

Sandy Rader
President, UPMC Presbyterian

TIPS FOR YOUR HEALTH AND SAFETY IN THE HOSPITAL

- **Review your care plan.** Each day you will receive a printed document called *My Daily Plan of Care*. It has information about your care in the hospital such as diet, tests, and laboratory results. Please ask your nurse if you do not receive the document.
- **Talk to your health care team.** Feel free to ask questions or have something explained if you do not understand. We encourage you to take notes and include your support person(s) to help you make important decisions.
- **Know your medicines.** Do not take any of your personal medicines unless your doctor or nurse tells you it is okay. You should give them to someone to hold for you. Before you leave, you should know the names of your medicines, the reason you need to take them, and possible side effects.
- **Control your pain.** We want you to be as comfortable as possible. Let us know as soon as you start to feel pain. If you get pain relief before the pain becomes bad, it takes less medicine to make you feel better.
- **Get your rest.** Rest is an important part of the healing process. Earplugs are available to help reduce noise. Please ask a member of your care team.
- **Prevent infections.** The most important step in preventing the spread of germs and infection is **handwashing**. When washing, rub your hands together vigorously. It's OK to ask anyone who enters your room if they have washed their hands! Try not to touch medical devices and minimize clutter in your room so surfaces can be cleaned.
- **Be a partner in your care.** Devices that go inside your body, such as a catheter in your bladder or an IV in your arm or neck, may be a source of infection if left in longer than necessary. It's OK to ask a care team member when they can be removed.
- **Be aware of fall risks.** There are many reasons people feel unsteady when getting out of bed or walking by themselves. As needed, ask for help before getting up. Non-slip socks are also available. Ask your nurse.
- **Stay active.** An important part of feeling better is getting out of bed and moving. Talk with your care team about safely getting out of bed.
- **Protect yourself and others by not smoking.** Smoking is not allowed on UPMC property. This includes hospitals, facilities, and grounds, including parking lots, garages, and other outdoor locations such as UPMC-owned sidewalks.
