

Pittsburgh Poison Center

# Childproof Your Home for Poison Prevention

- Post Poison Center number for easy access: **1-800-222-1222**. Save the poison center number in your phone by texting "poison" to 797979.
- Store cleaning products in original containers and keep in locked cabinet up & out of reach of little hands.
- **DO NOT** mix cleaning products! Mixing products can release gases that can be especially dangerous for babies.
- If you can't clean during nap time, do not look away or walk away from an open bottle or bucket of cleaner.
- Keep the diaper bag out of baby's reach. Diaper cream and wipes can be toxic.
- Turn on a good light to give your baby medicine. If the light is too dim you may misread the label and give the wrong medicine or the wrong dose.
- Put away all medicines and medical supplies. Remove pills from purses, pockets, drawers and the bathroom counter; put them in a secure cabinet.
- Share these tips with grandparents, sitters and any other people in whose house your baby plays.
